

in Germany and take their chance of survival with the German people. Soviet Russia would look askance at 185,000 anti-Soviet people mixing in with the Germans. And from the Allied military point of view, I was asked: "Having destroyed the Third Reich why should we now give to the German people such fine physique? That would help them to create a Fourth or Fifth Reich with an even physically stronger "master race".

Rudolph Ratsep, the Estonian leader, showed me a speech he had written for their national holiday. Here is a paragraph from it.

"We are deeply thankful to those who are taking care of us until our status is settled again. It would be so easy to abandon us to our fate, and yet we are being fed, clothed and sheltered and there is so little we can do to show our gratitude. We wish with all our hearts to be able to repay, by our own industry, everything that is being done for us!"

Use Old Raid Shelters

A tour of his community revealed the neat and businesslike way these exiled people are recreating a home life themselves in wooden huts. They are using subterranean tunnels, which formerly were air raid shelters, for workshops, store-rooms and exhibitions of arts and crafts. Above float the three national flags.

The Estonians put on a spectacular floor show in national costume. Blonde and brunette girls and straight, slim-hipped handsome young men danced together in quaintly named quadrilles. There was the Bear Dance, the Gypsy Dance, the Naughty Children dance and finally a dance for boys only, the Angry Bulls dance.

The group I saw would have scored great success in any circus. But you cannot take care of 87,000 persons that way. That is the number there are in the American zone. The British have more than 90,000. The French have 5,500 and may be able to absorb them.

AMONG OUR FRIENDS ...

ARNOLD ROSENBLUM

First it was Miriam winning one scholarship after another, now, her little bro (over six feet of handsome hunk of man) is doing the same. He was graduated from Hyde Park High in June of '46 and was voted by the class as (1) the outstanding student of the entire class of 550. (2) He received the Rensselaer Medal from Rensselaer College for having received straight S's in Math and Science throughout the four years of High School, and (3) he was awarded a full scholarship to Illinois Institute of Technology in competitive exams, receiving second place in an all Chicago area. Boy! You're simply good, Arni, more power to you.

HUMAN GUINEA PIG

John Carroll Jackson, native Iowan from Burlington, is having an odd job with Northwestern University Medical Nutrition Laboratory of being a human Guinea Pig. He is not permitted to eat any food that contains calcium, and he is kept indoors from sun rise to sun set, lest he see the sun. As a result, he is becoming a night hawk instead of a guinea pig. He is a good folk dancer and spent some time at the U. of Mexico where he learned Mexican dances. During the war he was stationed in a CPS camp in Trenton, N. D. He is interested in the sign language of the mutes and hopes to teach them folk dancing through the sign language. He attends regularly the folk dance sessions at International House.

THE GRIN OF HAPPINESS

Whether the letter is written by Victor Schmidt, Lee Vern Brotherton, Lyle Rostad, Donavon Nickel or others, all tell the same story: "We are working long hours shocking the fields". AS FOR MYSELF

With the dancing of Blezdingēlē (The Swallow — Lithuanian autumnal dance of farewell to the fields) and with joined hands the singing of Viva La compagine, our last session at the International Peace Gardens on the Canadian border of North Dakota came to a close.

We traveled through Chippewa Indian farm lands and passed the cities of Dunseith, Bottineau, Souris and Mohall, and finally reached Minot, third largest city in N. D., where Lyle Rostad and his folks came to take Vernon Rostad and me to their home in Roseglen, 60 miles South. And of all things... even in N. D. I met several people I knew, including Mrs. Nicheporenko, from Butte. After a delicious dinner with the Anton Rostads, and shopping in the big city, we left for the Rostad home where I had a delightful two day visit. We had a Junior Farmers Union Recreational party, did folk dancing and met many new friends.

That night the Rostad homestead was invaded by skunks which killed dozens of chickens. A skunk hunt ensued. I never experienced near contact with a live skunk and I never imagined that the odor of skunk was actually as powerful as folk were wont to say. Well, I believe now.

N. D. is still thickly populated with wild life; not only skunks, but badgers, minks, cotton tails, coyotes, prairie dogs, deer and many others, not to mention birds: Whipp-wills, bob o' links, magpies, black birds, red winged black birds, meadow larks, prairie chickens, grouse and pheasants. The pheasants seem to be numerous — broods walking boldly across the highways surrounded and "protected" by the gaily feathered and handsome cock. A hunters paradise.

Near Roseglen is another large Indian Reservation,
